NEWSLETTER MAY 2010

## Pullmatic New Compact In 70 m<sup>2</sup>

*The FCP Compact supplies a cost effective solution with its small foot print, handle carriage system for loading of raw material and picking / sorting of punched parts.*

### DSK Engineering

DSK Engineering in Pontefract has chosen to invest in Pullmax. DSK's main focus has been working on sheet metal using laser technology. By investing in a Pullmatic 720 they are now increasing their potential to manufacture more complex products which are being finished directly in the punching machine.

### Tom Chandley

The supplier of bakery equipment Tom Chandley Limited in Manchester has invested in a Pullmatic 520 with Compact handling equipment. The machine at Tom Chandley Limited is equipped with Pullmax's new Compact handling system which allows loading and unloading and parts picking to be carried out from one side of the machine and this saves many square metres without sacrificing flexibility or speed.

### Office Address

Address: 1 Riley Court,  
Millburn Hill Road  
Coventry  
CV4 7HP  
Fax: 02476 323227

Since September 2008 we have been working from our newly established premises at Riley Court, in the University of Warwick's Science Park in Coventry. Our new facilities have enabled us to have better access to all our customers around the country. This is our first of many Newsletters and we just want to take this opportunity to update our customers on our recent developments and news.

### For Spare Part Enquiries

## Partnership with Avalon Enterprise!

**Pullmax collaborates with Avalon Enterprise for the future of the punching machine!**

Pullmax has called on their partnership with Avalon Enterprise who are specialists in helping their partners develop better products and systems faster! This will enable the already very successful range of Pullmax Punch Machines and Handling systems to continue to lead the field through technological development.

With nearly 300 specialists in various fields Avalon is a perfect partner for Pullmax. Avalon has a broad sheet metal competence that will challenge and develop Pullmax who have more than 70 years experience in the manufacturing of sheet metal working machines.

*"Alliance with Avalon, which is internationally known as the "Scandinavian Innovation Company", is increasing our ability to develop our punching machines to continue to be in the forefront of technology, usability and efficiency."*

**Richard Lofgren,**
